

# Stay tuned into fire safety

You've just posted that pic onto Facebook of the kids with their faces painted, when you notice the smoke in the kitchen from the bacon burning in the pan. Why didn't the smoke alarm go off?! Oh yes, you remember taking the battery out when it was beeping... crikey that was about 4 weeks ago... anything could have happened!

The smoke from a fire can make you unconscious while you sleep and can **kill your child in less than a minute.**

## Prevent fires

- Keep matches and lighters out of sight and reach of young children
- Stub your cigarette out properly and avoid smoking if you're really tired (or in bed) - you may fall asleep with it in your hand
- Change your chip pan to an electric one if you can. If not, never fill the pan more than half full
- Store your hair straighteners safely. A growing number of house fires are caused by hair straighteners left switched on
- Take care not to overload electrical sockets. For example, if you use the combination of a toaster and a kettle on an extension lead running from one socket, it's dangerously overloaded.

## Plan your escape

- Work out the route to get out of the house, make sure family members know and practice it together
- Keep the stairs and the escape route clear of clutter at night
- Keep keys to any doors on your escape route in one place so you know where they are in an emergency.

## Check your smoke alarms

- You need a working smoke alarm both upstairs and downstairs, to warn you quickly if a fire starts
- Test your alarms every week
- If your alarm keeps going off while you're cooking, don't remove the battery - the chances are you'll forget to put it back. Instead move it further away from the kitchen or fit one that has a silencer button
- Encourage children to get involved in testing the smoke alarms.

# Fire safety

You're 4 times more likely to die in a house fire if there's no working smoke alarm.

## Activity ideas

- Call the fire and rescue service. Ask if someone can come to talk to your group about the importance of smoke alarms and fire escape routes.
- All UK fire and rescue services provide free home fire safety checks. They fit free smoke alarms in the homes of the most vulnerable families and some offer this to all families. Make sure your families know how to find out more.
- Teach children what they should do if a fire breaks out at home. Do they know to call out to alert other people? Do they know the different ways out of their home? And that if the house is very smoky, they can get out by crawling along the floor as there's less smoke down there?
- For Scotland visit the Go Safe Scotland website [www.gosafescotland.com](http://www.gosafescotland.com) for a range of fire activities for Early Level and Levels 1 and 2.

## CAPT resources for your event

- How safe is your child from burns and scalds? leaflet
- How safe is your child at home? leaflet
- I'm only a baby but... booklet
- Now I'm a toddler I can... booklet
- Now I'm getting bigger I can... booklet
